

Exclusive China Licensing of Lilly's Diabetes Drug, Oxyntomodulin Analog

Investor Webcast, August 22, 2019

Innovent

Disclaimer

This presentation includes forward-looking statements. All statements contained in this presentation other than statements of historical facts, including statements regarding future results of operations and financial position of Innovent Biologics (“Innovent” “we,” “us” or “our”), our business strategy and plans, the clinical development of our product candidates and our objectives for future operations, are forward-looking statements. The words “anticipate,” “believe,” “continue,” “estimate,” “expect,” “intend,” “may,” “will” and similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy, clinical development, short-term and long-term business operations and objectives and financial needs. These forward-looking statements are subject to a number of risks, uncertainties and assumptions. Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the future events and trends discussed in this presentation may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance, achievements or events and circumstances reflected in the forward-looking statements will occur. We are under no duty to update any of these forward-looking statements after the date of this presentation to conform these statements to actual results or revised expectations, except as required by law. You should, therefore, not rely on these forward-looking statements as representing our views as of any date subsequent to the date of this presentation.

This presentation also contains estimates and other statistical data made by independent parties and by us relating to market size and growth and other data about our industry. This data involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates. Neither we nor any other person makes any representation as to the accuracy or completeness of such data or undertakes any obligation to update such data after the date of this presentation. In addition, projections, assumptions and estimates of our future performance and the future performance of the markets in which we operate are necessarily subject to a high degree of uncertainty and risk.

This presentation may not be all inclusive and may not contain all of the information that you may consider material. Neither Innovent nor any of its affiliates, shareholders, directors, officers, employees, agents and advisors makes any expressed or implied representation or warranty as to the completeness, fairness, reasonableness of the information contained herein, and none of them shall accept any responsibility or liability for any loss or damage, whether or not arising from any error or omission in compiling such information or as a result of any party's reliance or use of such information. By attending or receiving this presentation you acknowledge that you will be solely responsible for your own assessment of our business, the market and our market position and that you will conduct your own analysis and be solely responsible for forming your own view of the potential future performance of our business.

This presentation is intended solely for investors that are qualified institutional buyers or institutional accredited investors solely for the purposes of familiarizing such investors with Innovent and determining whether such investors might have an interest in a securities offering contemplated by Innovent . Any such offering of securities will only be made pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act of 1933, as amended, or by means of a registration statement (including a prospectus) filed with the SEC, after such registration statement becomes effective. No such registration statement has been filed, or become effective, as of the date of this presentation. This presentation shall not constitute an offer to sell or the solicitation of an offer to buy any securities, nor shall there be any sale of any securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction.

Executive Summary

Innovent's Innovation Journey

High Probability –
Foundation Molecules

Fast Follow –
Novel Molecules

Best in Class –
First in Class

Internal
Innovation:

Biosimilar Focus

Novel PD1 (Sintilimab)

Bispecfics

External
Innovation:

Partnership with Adimab

Partnership with Lilly

Bispecific Partnership w/ Lilly
Partnership w/ Incyte
OXM3 Partnership w/ Lilly

20 Pipeline Products in Development – Oncology & Metabolic Focus

17

Oncology Pipeline Products

- Tyvyt (sintilimab injection), approved and launched
- Two NDA Applications submitted; bevacizumab biosimilar and rituximab biosimilar
- Three late stage small molecules from our Incyte collaboration
- Six mono-specific antibodies
- Six first in class bi-specific antibodies

3 +1

Metabolic Pipeline Products

- Auto-immune: NDA Application submitted, Adalimumab biosimilar
 - Metabolic: PCSK9 antibody
 - Ophthalmology: bi-specific fusion protein
- ↓
- Diabetes: OXM3

The In-license of Lilly’s mid-stage best-in-class, first-in-class OXM3 diabetes molecule enhances the strength of our metabolic pipeline

Innovent licenses Lilly mid-phase diabetes molecule

Innovent

Receives development and commercialization rights to OXM3 in China

Lilly

Financial terms not disclosed

Lilly retains ex-China development and commercialization rights and it is under active development

Three Key Whys

WHY DIABETES?

Innovent has evaluated various TAs for expansion and found Diabetes to be attractive:

- There are a huge number of diabetic patients in China
- The diabetes problem is getting bigger every day
- Chinese people are getting more obese every day
- Many innovative products are being developed and are available for partnering

WHY DIABETES FOR INNOVENT?

- As a premier biotech in China, we focus on the biggest and most important unmet needs
- Attractive enhancement of our successful partnership with Lilly into diabetes, where Lilly is already a global leader
- OXM3 is a Phase 2 ready best-in-class analog of a naturally occurring hormone
- Other Oxyntomodulin analogs have already validated the approach
- OXM3 is Lilly's 3rd generation analog, an improvement vs. earlier analogs
- OXM3 will be an anchor molecule for Innovent's future diabetes portfolio

WHY OXM3?

Building onto an Already Successful Long-term Partnership

Long Partnership

- Lilly led Innovent's 2012 Series B Round
 - We have been in our oncology partnership since 2015
-

Benefits for Lilly

- Innovent will move OXM3 to patients in China rapidly
 - Innovent is a trusted partner with a focus on quality
-

Benefits for Innovent

- Lilly is a global leader diabetes with a robust pipeline
- Lilly will provide important technical support as we develop the molecule

China is the Country with the Highest Number of Diabetics Worldwide

Prevalence and control of diabetes in Chinese adults, JAMA, Sep 2013
IDF Diabetes Atlas 2017

Diabetes in China

SmithStreet Aalysis; 18th CDS National Meeting
Prevalence and control of diabetes in Chinese adults, JAMA, Sep 2013
Prevalence of Chinese diabetes patients, NEJM, Mar 2010

OXM3 Positioned Against Diabesity: Diabetes and Obesity

PROBLEM: DIABESITY

IN CHINA:

- 12% of adults are obese
- >30% of overweight/obese people have diabetes
- 12% of adults are diabetic
- >40% of diabetic patients are overweight/obese

ANSWER: OXM3

- OXM3 is an engineered analog of oxyntomodulin, a naturally occurring 37-amino acid peptide hormone
- OXM3 is a dual-agonist that targets both the GLP-1 receptor and the Glucagon receptor
- OXM3 is an injectable that is expected to offer strong glucose lowering and best in class weight loss – addressing an unmet need for a large portion of type 2 diabetes patients

Treatments that can offer **3-5%** weight loss in patients with diabetes and obesity will significantly improve blood pressure, lipids, glucose, and will improve quality of life.

Xu Y, et al. JAMA, 2013,310(9):948-959
China CDC.Chinese residents nutrients and chronic disease report(2015)
Hou Xu, et al. Plos One,2013,8(3):e57319
Wengying Yang et al. N Engl J Med 2010;362:1090-101

Type 2 Diabetes Patient Journey after Lifestyle Changes alone Fail to Achieve Target

Next Generation molecules in the First Injectable Segment is Moving to Dual Agonists

	GLP-1 Single target agonists	Dual Agonists (OXM3s)
Global	Liraglutide, Exenatide, Dulaglutide, Semaglutide, Benaglutide, Lixisenatide	Eight <u>GLP-1/Glucagon or other combination dual agonist</u> compounds are under clinical development globally. Four in Ph2 and four in Ph1.
China	Liraglutide, exenatide, Benaglutide	Currently there are no clinical stage dual agonist compounds in clinical development
MOA	<u>GLP-1 Receptor activation:</u> 1.Increase Glucose dependent insulin secretion. 2.Inhibit Appetite; Slow down Gastric emptying 3.Glucagon secretion inhibition 4.Decrease Hepatic glucose output	<u>GLP-1 Receptor activation:</u> These molecules do every thing that GLP-1 molecules do  <u>Glucagon Receptor activation:</u> 1.Enhanced appetite suppression 2.Increased energy expenditure

- OXM3’s affinity ratio has been optimized against GLP-1 and the Glucagon receptor in order to optimize glucose control and reduce weight

Transformative Opportunity to Establish Presence in Diabetes

Innovent

Primarily an Oncology Company

Lilly

Global Leader in Diabetes

OXM3 Partnership

Innovent

Oncology and Metabolic Disease Company

- OXM3 is a best in class anchor molecule upon which Innovovent will build a diabetes pipeline through further licensing and/or M&A efforts
- Diabetes will be a key focus area going forward
